

SAVE THE SERVICES THAT SAVE US

The Doug Ford government is planning to:

Cut Public Health funding & **close** 25 out of 35 local Public Health Units, reducing them to 10.

Close 49 out of 59 local ambulance services, reducing them to 10 & **close** 12 of 22 local dispatch centres.

Make **real-dollar cuts** to public hospital funding, even though we have the fewest hospital beds left per person of any province in Canada and a crisis of hospital overcrowding. More cuts mean more services & staff cuts, less services, longer waits, more privatization & higher death rates.

Make **real dollar cuts** to long-term care homes, forcing municipalities to either raise taxes or cut services for elderly & chronic care residents.
